## Why Teachers Love Educational Impact

I have never had training like this that had so much information that is going to be so helpful. This was better than going someplace and sitting. I could do it at my own pace, plus with my hearing disability I could hear it all. I am a visual learner, so that is another plus.

**L. Shearer**, Manatee Public Schools  
*Manatee, FL*

All the videos were interesting and made me think about handling different situations in the classroom. Writing about the different situations I saw really made me think about my reactions to the students and their actions. I would consider it one of the more interesting and real-life courses I've taken.

**C. Kashner**, School District of Upper Dublin  
*Maple Glen, PA*

I gained new insights on how to incorporate things in my classroom. It gave me inspiration to try an reinvent some old things to today's way of learning.

**P Hovland**, Whitney ISD  
*Whitney, TX*

I believe that the best assignments were the discussion forum questions. It allows for online participators to engage and interact with other participators. I learned a lot from the views, experiences, and opinions of others.

**R. Griffith**, Jefferson County Public Schools  
*Louisville, KY*
